EMAIL SIGNATURE SETUP GUIDE

Microsoft Outlook

Add your KARSTATION account to Outlook and install your official email signature, step by step.

What you need

- Microsoft Outlook installed on your computer
- Your KARSTATION email address and password
- The KARSTATION Email Signature Generator (open it in your browser)

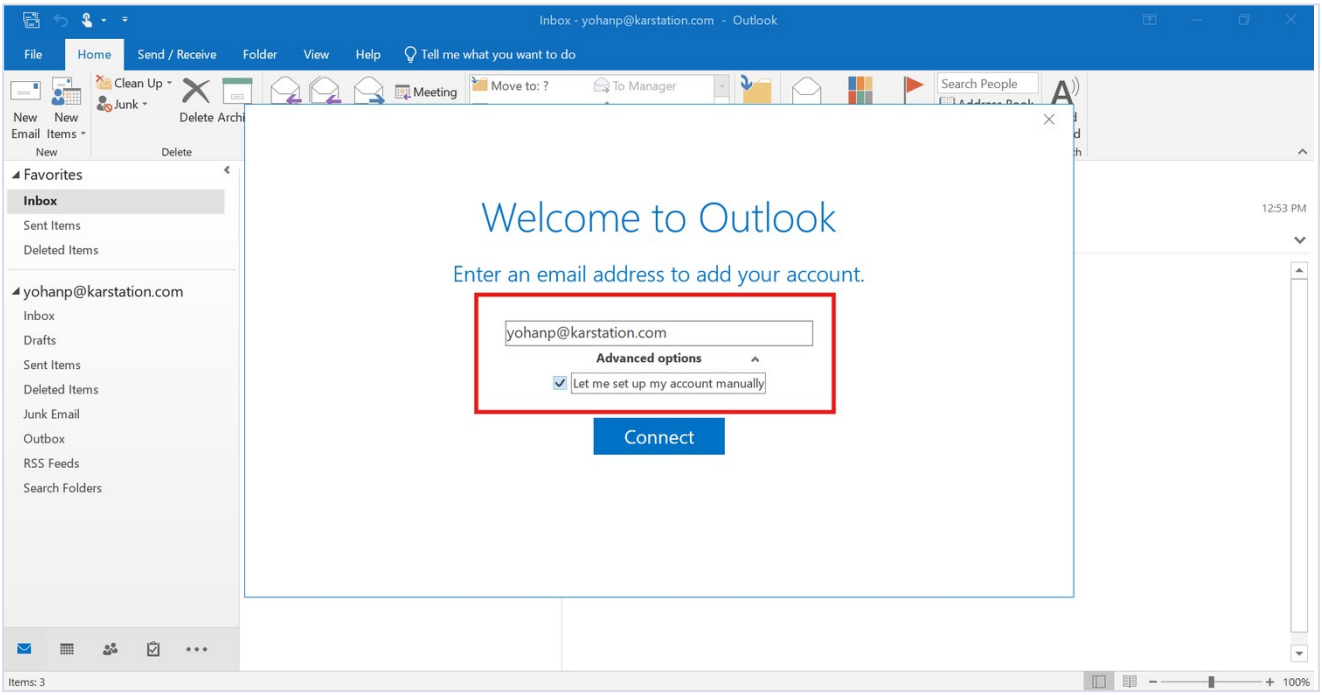

PART 1 OF 2

Add your email account

Already have your KARSTATION account in Outlook? Skip ahead to Part 2.

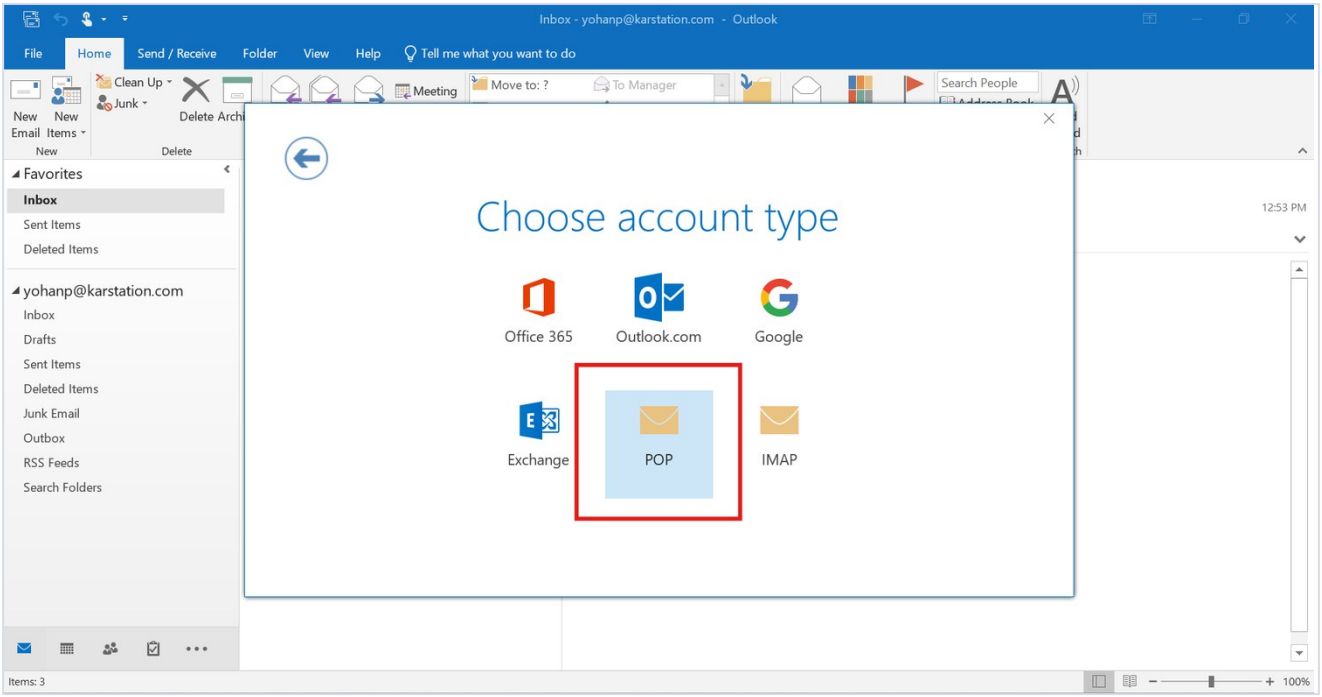

1 Start the account setup

Open Outlook and enter your KARSTATION email address. Click **Advanced options**, tick **Let me set up my account manually**, then click **Connect**.

2 Choose the account type

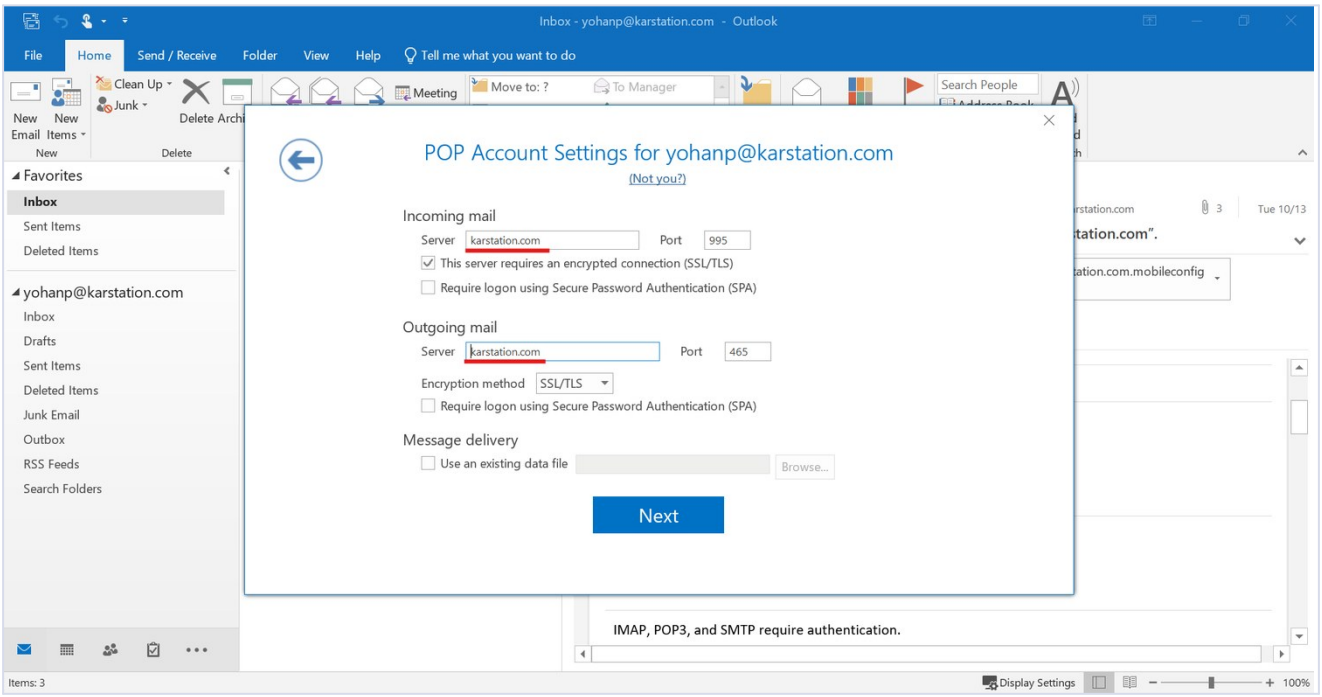

On the **Choose account type** screen, select **POP**.

3 Check the server settings

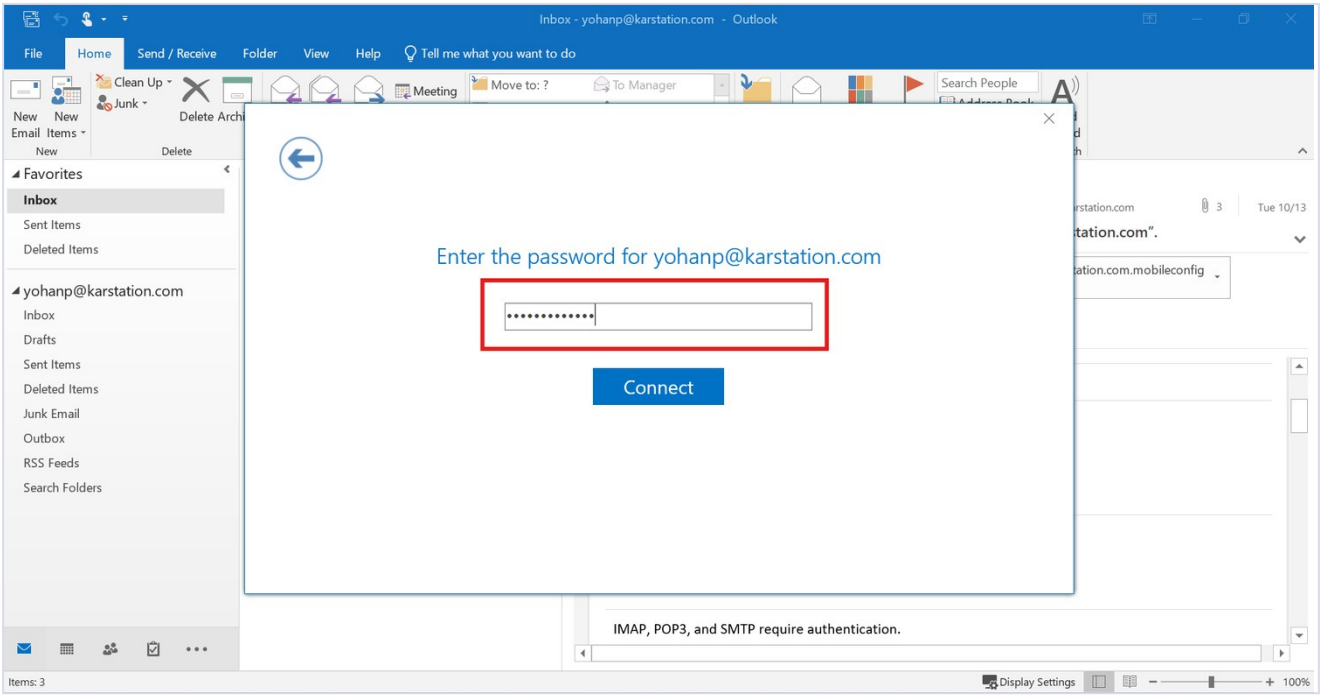

Make sure the incoming and outgoing servers match the settings below, then click **Next**.

Settings: Incoming mail: server karstation.com, port 995, SSL/TLS ticked. **Outgoing mail:** server karstation.com, port 465, encryption method SSL/TLS. Leave both Secure Password Authentication boxes unticked.

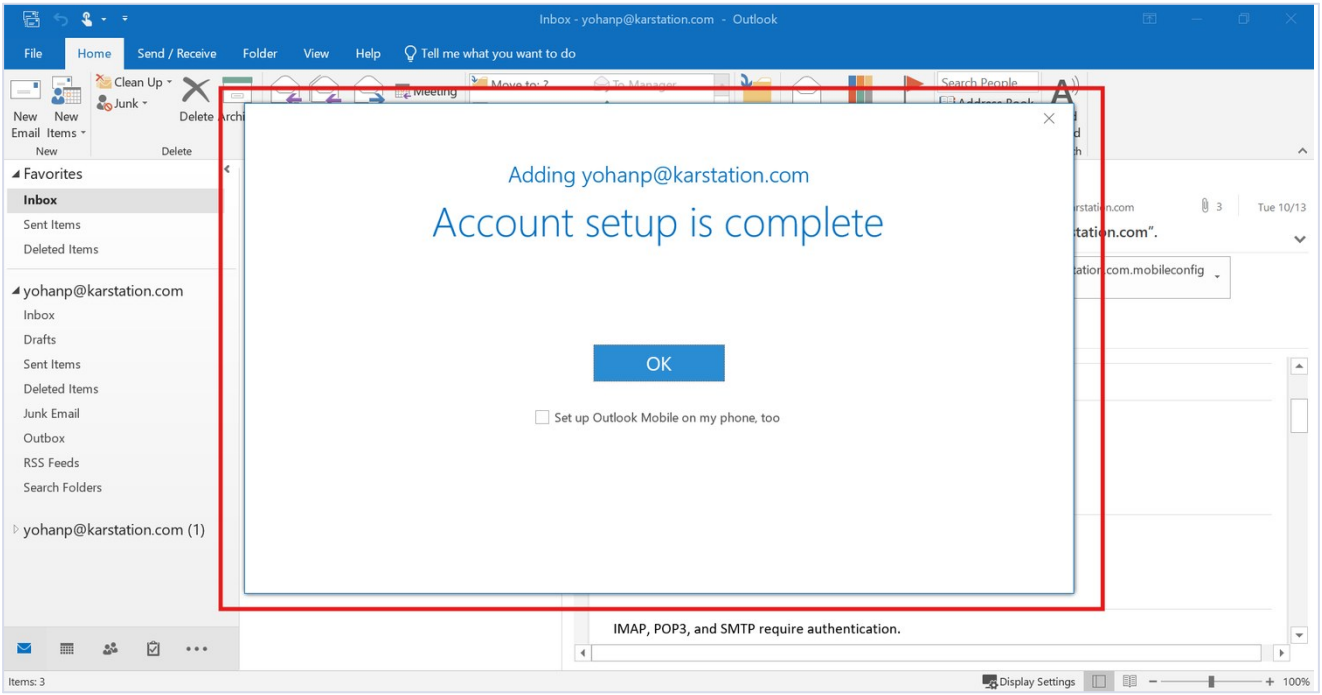

4 Enter your password

Type the password for your KARSTATION email account and click **Connect**.

5 Finish the setup

When you see **Account setup is complete**, click **OK**. Your account now appears in the left-hand folder list.

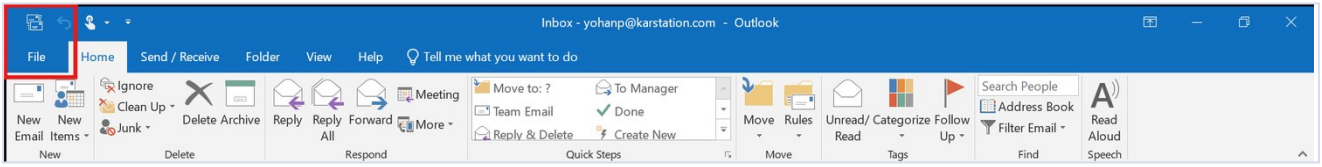

PART 2 OF 2

Install your email signature

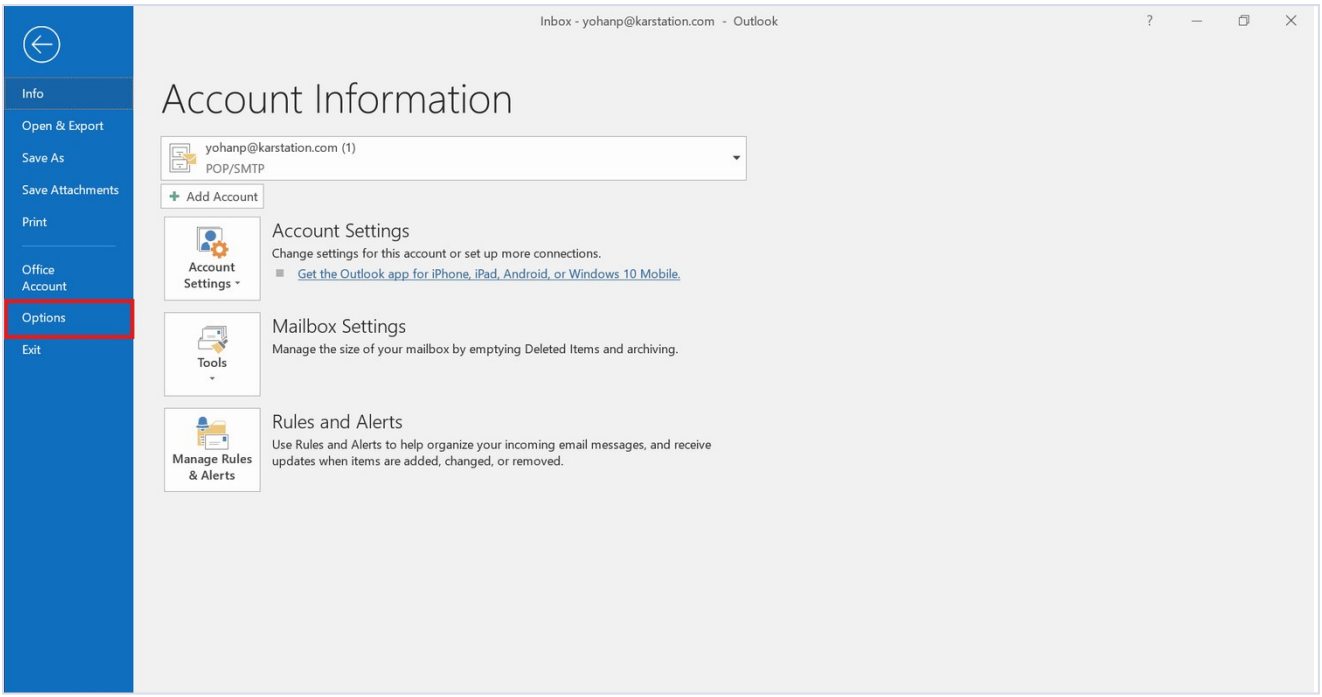

1 Open the File menu

In Outlook, click **File** at the top left.

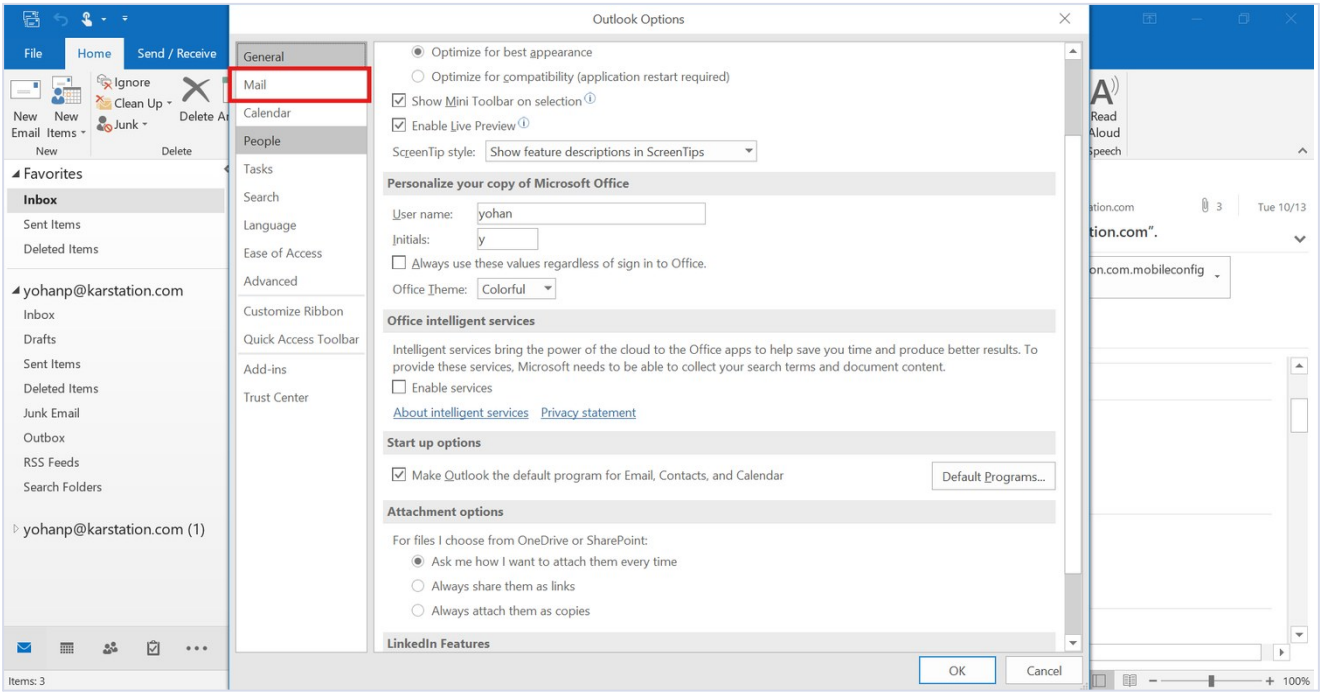

2 Open Options

In the left-hand menu, click **Options**.

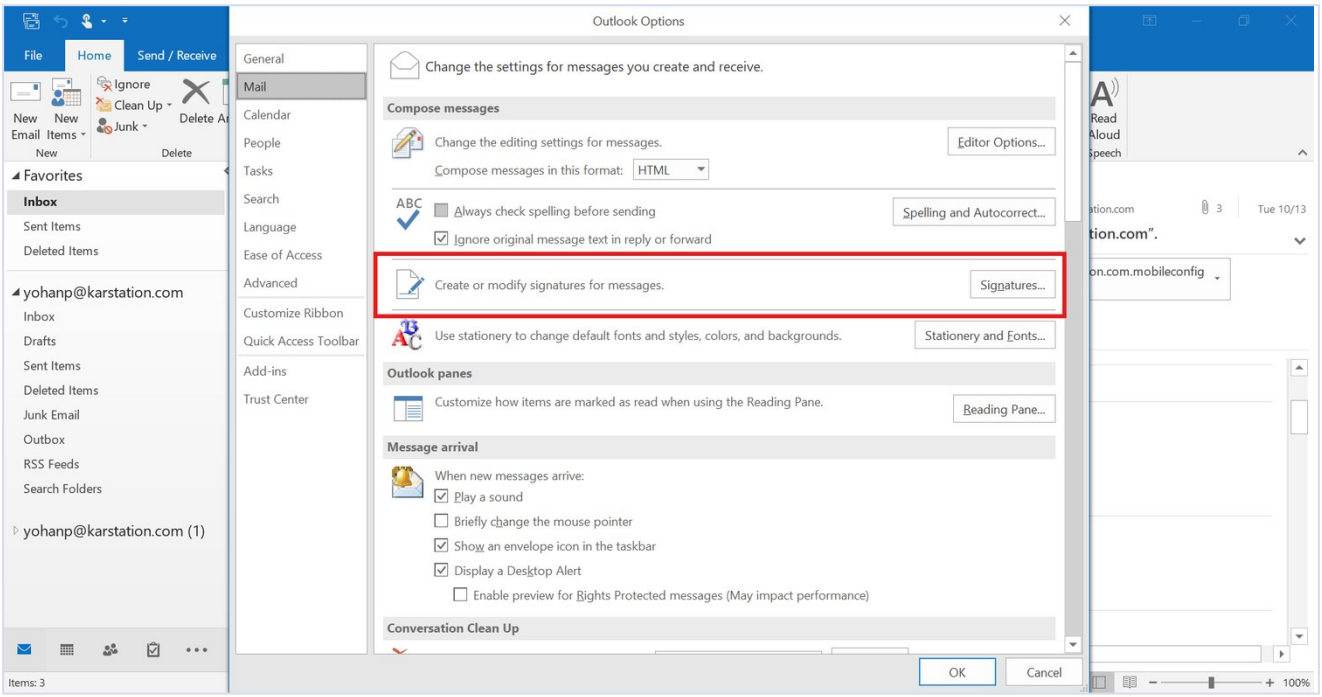

3 Go to Mail

In the Outlook Options window, click **Mail**.

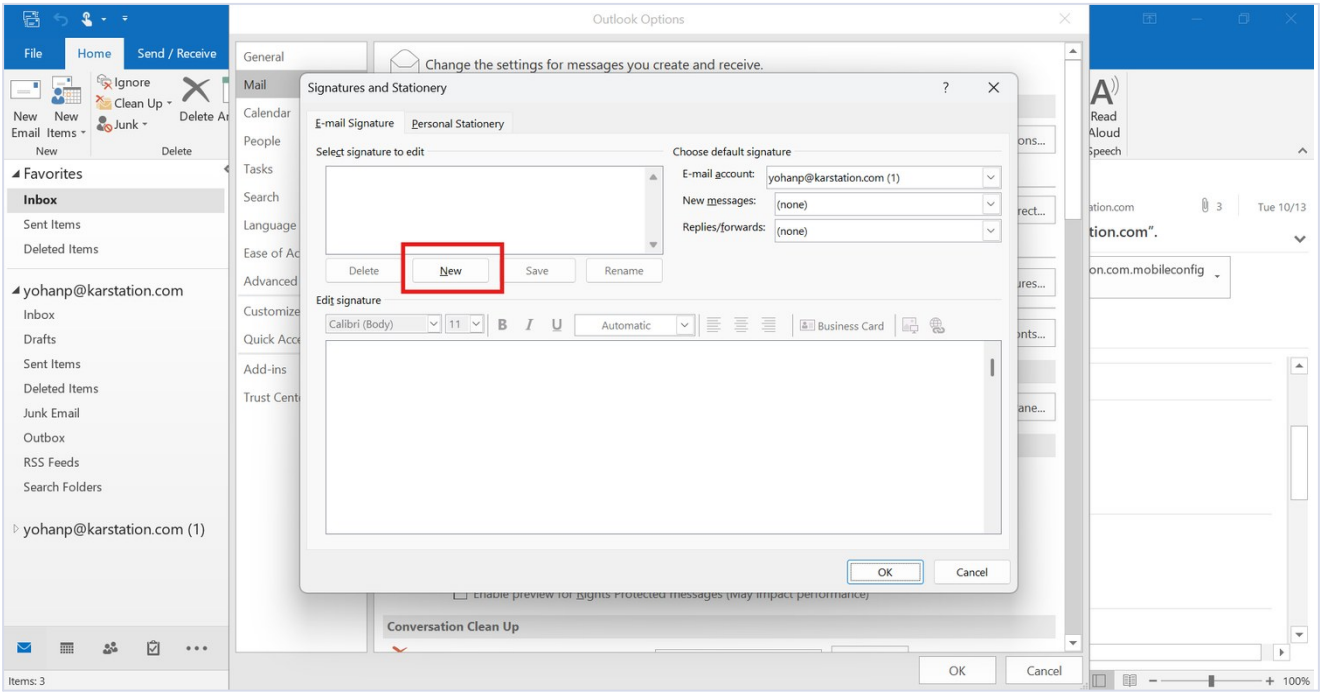

4 Open Signatures

Under **Compose messages**, click the **Signatures...** button.

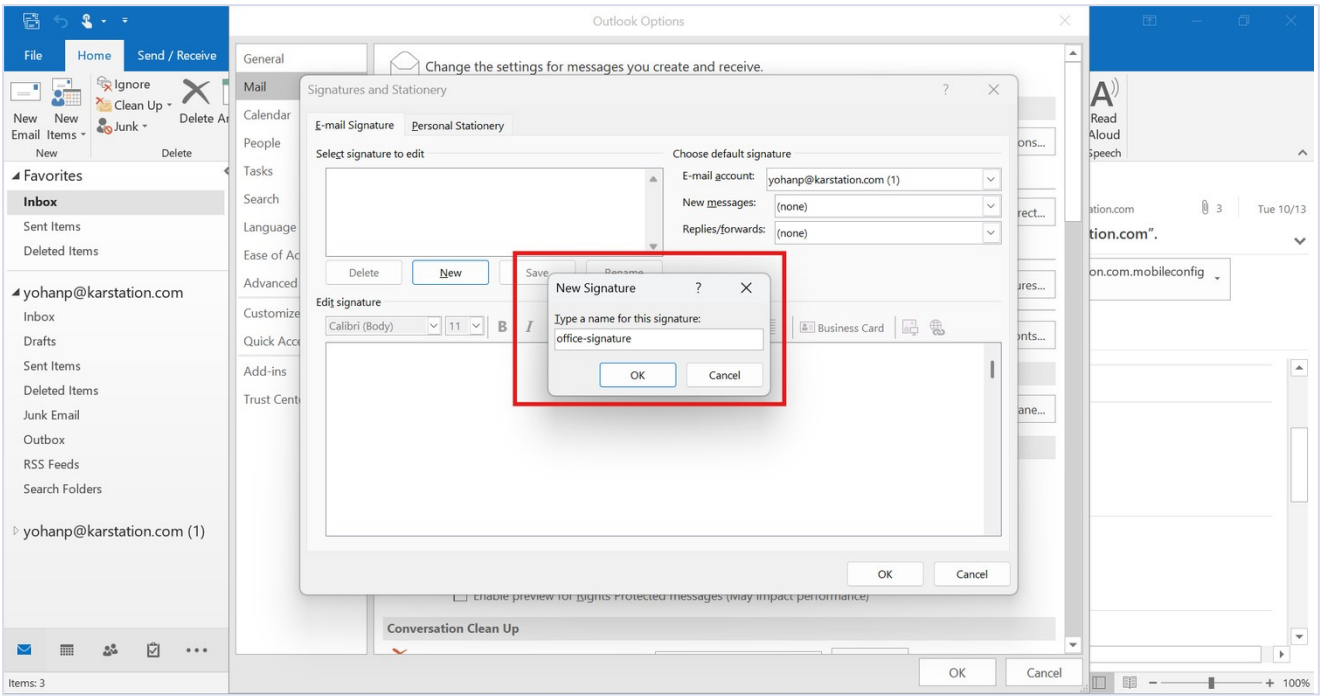

5 Create a new signature

In the Signatures and Stationery window, click **New**.

6 Name your signature

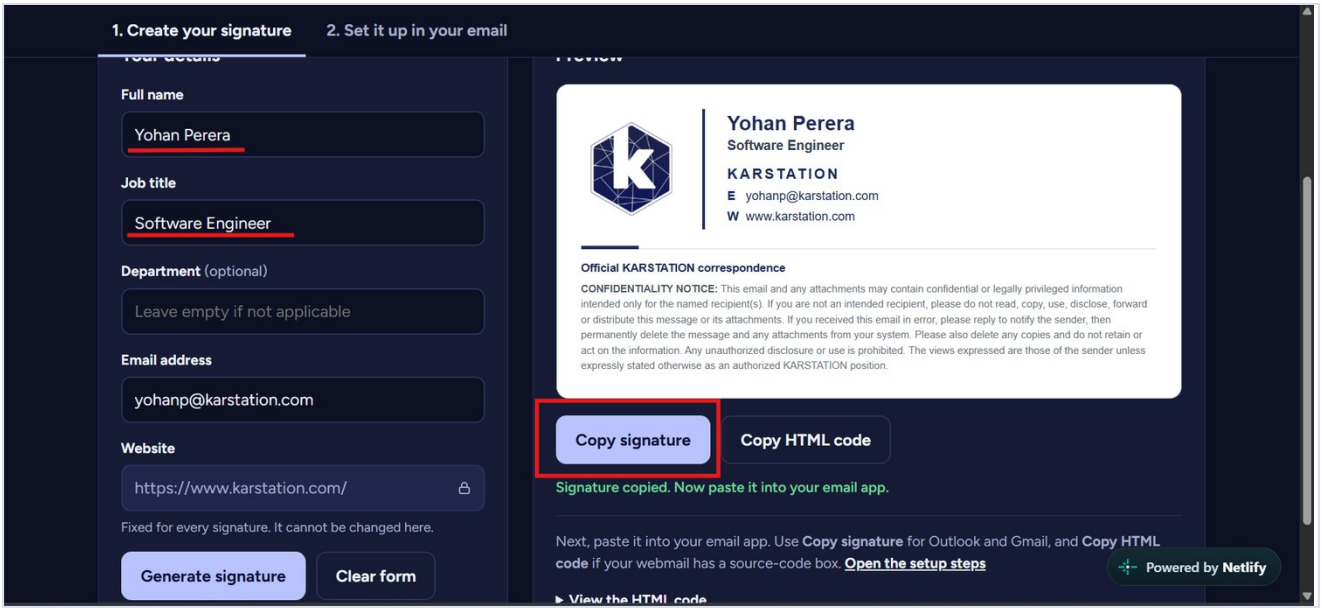

Type a name for the signature, for example **office-signature**, and click **OK**.

7 Generate and copy your signature

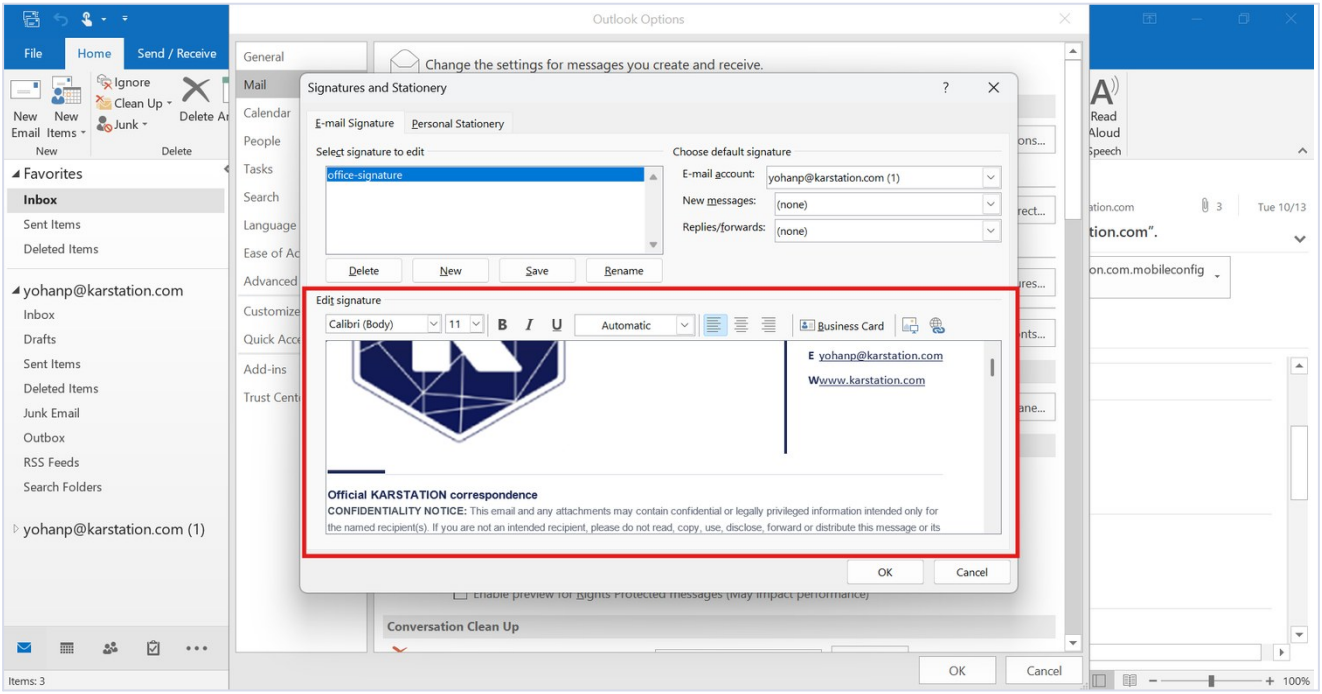

Open the KARSTATION Email Signature Generator. Enter your **Full name** and **Job title** (add a **Department** if it applies) and check your **Email address**. Click **Generate signature**, then click **Copy signature**. You will see a message confirming the signature was copied.

> **Tip:** The website address is fixed for every signature and cannot be changed. Check your name and job title for spelling mistakes before you copy.

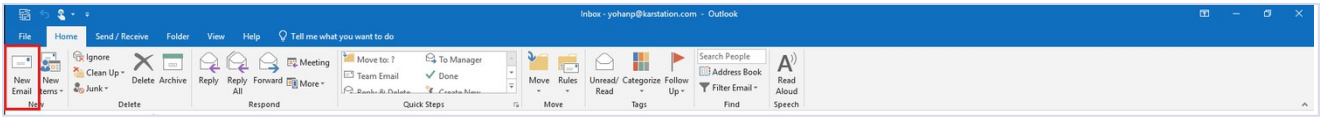

8 Paste it into Outlook

Go back to Outlook, click inside the **Edit signature** box and press **Ctrl + V** to paste. Under **Choose default signature**, set **New messages** (and **Replies/forwards**, if you want it on replies) to your new signature. Click **Save**, then **OK** in both windows.

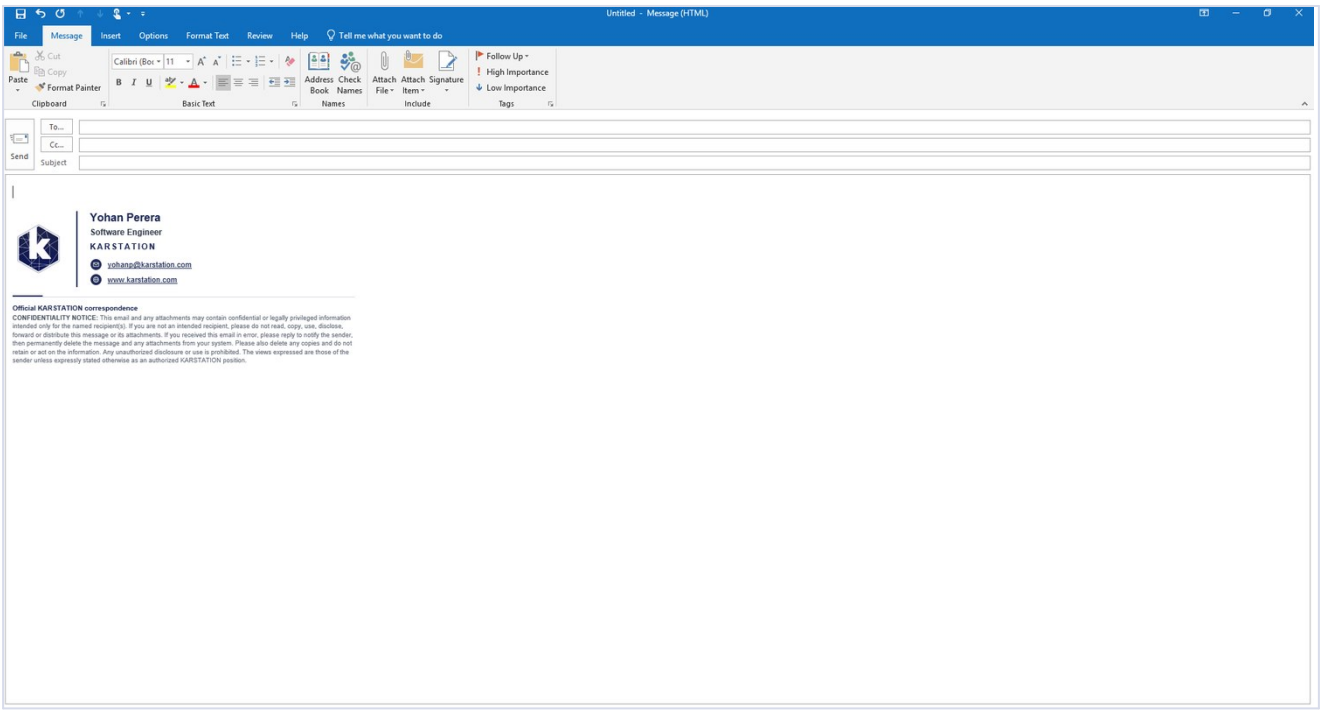

9 Start a new email

Back on the Home tab, click **New Email** to test your signature.

10 Check the result

Your signature appears automatically at the bottom of the new message. Check that your name, job title, email address and website are correct. You are all set.

> **Troubleshooting:** If the signature does not appear in new messages, return to File > Options > Mail > Signatures and confirm it is selected under **New messages** for your KARSTATION account.
